Vol. 3 No. 3

Number 14

March 1994

top view

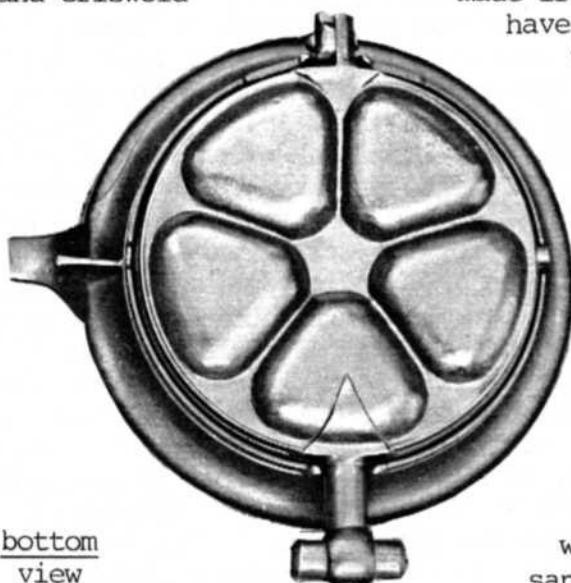

Pictured here is one of the more unusual pieces of iron cookware that I have seen. On top it reads- EGG BAKER JOHN B. HARKER & CO. MINNEAPOLIS. Looking

exactly like a waffle iron from the top side, one would not know otherwise without seeing the inside or bottom of the iron. I have no information about Harker & Co. nor do I recall seeing other pieces made by them. It appears that an egg would be broken into each cup in the bottom pan, baked for a short time, and then flopped over so the top would also brown. The center section might have been to allow the cups to overflow into adjacent cups if necessary, or to melt butter on and have it run into the cups before cracking eggs into them.

I always take a quick peek inside any "waffle irons" that I see just in case one might not be a waffle iron, but something else like this egg baker. Both Wagner

made irons that look exactly like their waffle irons but have no waffle grid on the inside. Wagner called theirs an Omlette and Cake Baker. Griswold's similar iron was made using their waffle iron pattern numbers 314 and 315 but with the waffle grid removed to give a smooth inside. The only one that I have seen was brought to me by a friend to see. I did not understand why he would bring me a common Griswold waffle iron until I opened it up and saw the smooth-surfaced insides of the iron. A photo of the pan is on page 134, bottom left, in the recent Griswold Cast Iron Price Guide book by L-W Book Sales. Such a rare piece that one might overlook as being common if a look at its insides wasn't taken. Other irons to look for with similar appearance to and construction of waffle irons are wafer irons, corn dog irons, sandwich grills and broilers.

LETTERS TO THE EDITOR

I have seen several pieces (dutch ovens, muffin pans, etc.) marked with both the Griswold and Wagnerware trademarks; these have almost always been priced at some astronomically high amount. I did find and buy one popover pan with both markings at a reasonable price. However, it does not look as well made as similar items by Griswold or Wagner. Are these items real (i.e. not fake or repro)? If so, I would assume that they represent the brief period when Wagner was using Griswold patterns after acquiring the company. Have any other collectors seen similar pieces? I have found very few pieces marked LODGE (one #8 skillet, one waffle iron), although I would think their current productivity must reflect a high past output. Are most Lodge items unmarked? If so, is there a way to ascribe such pieces to Lodge on style or pattern or identifying structures?

Travis Solomon, MO

In answering your questions let me begin with some information from The Housewares Story by Earl Litshay, 1973: "In 1955 the Griswold Mfg. Co. was acquired by McGraw Edison Inc. and two years later they sold it to the Randall Co. of Cin. O. which, four years earlier had acquired Wagner Mfg. Co. Eventually Griswold became part of the General Housewares Corp." Also—"In November, 1952, Wagner was purchased by the Randall Co., a manufacturer of automobile stampings and leather working machinery, which, in 1957, also bought the Griswold Mfg. Co. from McGraw Edison. In 1959 Randall sold both cookware companies to Textron. Ten years later they were acquired by the General Housewares Corp." If this information is correct it is clear that Wagner did not buy Griswold directly, but that both companies had gone through ownership changes before they came together under one owner. In any case, Griswold ceased production at their Erie, PA foundry in December, 1957. All subsequent production of "Griswold" and Wagner iron cookware has been at the Wagner foundry in Sidney.

Ohio. Travis, the double marked pieces you ask about are probably a product of General Housewares Corp., cast in the Wagner foundry using, in some cases, old Griswold patterns. I remember the double marked pieces being sold in the local Macys store sometime during the 1970's and I would assume that they were made during this period unless they were old stock being sold. It is my opinion that these pieces, and any other pieces of "Griswold" that were not made in the Erie foundry, are not real Griswold: They were made in a different foundry, on different machinery, by different people and, often, using modified Wagner patterns. The quality is definitely inferior to the Erie-made pieces. For collectors appreciating the fine quality and design of the real Griswold, the later pieces like the double marked ones should be of little value. Perhaps the high asking prices are from collectors and dealers who don't know exactly what they have and cannot differentiate the fine quality/design of Erie-made Griswold and the later pieces. With few exceptions, all Erie-made Griswold is marked ERIE PA, and is never marked with an inch size (such as $10\frac{1}{2}$ inch skillet) or "Made in USA".

Lodge, a family owned business since its founding in 1896, did mark many of its earlier pieces. I cannot be certain when they were marked but will guess that it would be in the 1920's or before. I have seen skillets, dutch ovens, chicken fryers, waffle irons and possibly other pieces marked LODGE on the bottom or on the top of covers. Their iron during this early period was of high quality with a very smooth surface that seems to resist rusting better than other makes. I just dug up some information from Lodge indicating the company was founded by Joseph Lodge in 1896 under the name Blacklock Foundry. In 1910 the name was changed to Lodge Mfg. Co. This might indicate that the marked pieces would be after 1910. Also stated is "the name Lodge was never marked on our products due to private labeling for Sears, etc." Of course this statement would be incorrect for the early years. I have never seen any muffin pans marked Lodge. One way to tell earlier Lodge pieces is to look on the bottom for a small (about $\frac{1}{4}$) raised, capital letter, seemingly randomly placed. Heat rings, on pieces that had them, will have a small (about $1/8"$) break. Lodge, in current production, is beginning to mark at least some of its pieces. I just saw two interesting muffin type pans: One had five fish and the other five Saguaro cactus. Both pans were marked on the bottom.

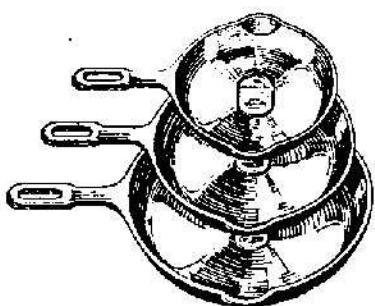

"Mountain Grade skillets made by Griswold

In searching for cast iron cookware you are likely to encounter some of the skillets shown in the cut below taken from a c.1940 Thompson diggs Co. hardware catalog. The skillets are some of the finest quality castings made by Griswold which shows that, even in wares made for the lower-end trade, Griswold did not skimp on quality. Probably sold to wholesalers and/or retailers as a lower priced line to supplement the regular Griswold skillets, these pans have typical Griswold pouring lips, a distinctive handle, an inset heat ring on the bottom, and are marked only with the size and pattern number on the bottom. Thompson Diggs priced their regular Griswold skillets at \$.74, \$1.16, and \$1.60 each for sizes 3, 5, and 8 for a total set cost of \$3.50 as opposed to the \$2.50 for the same sized Mountain Grade skillets as a set. I have identified the following Mountain Grade skillets and pattern numbers. It seems doubtful that sizes 11 and 13 were made.

3 1031	7 1032	12 1084
4 1029	8 1033	14 1085
5 1030	9 1082	
6 1081	10 1083	

Regarding the name "Mountain Grade": I do not know if this was a name applied by Griswold or by Thompson Diggs, or someone else. Also made were the following matching pieces. (The dutch ovens, of course, do not have the distinctive handle that the skillets do).

1034	8	deep skillet/chicken fryer
1035	8	cover for above (will fit 1033)
1036	8	dutch oven
1037	8	cover for dutch oven
1038	9	dutch oven
1039	9	cover for dutch oven
1040	10	dutch oven
1041	10	cover for dutch oven

Mountain Grade—Cast Iron—Ground

This set consists of three standard size skillets, size numbers 3, 5 and 8.

No. Set	Quantity in Set	No. Sets in Box	Wt. Set	Per Set

The Best Waffle Irons

For those of you who, like me, like to use your waffle irons I want to give my opinion as to which waffle irons I consider to be the best ones to use. Having restored and used close to 25 different irons, I have kept the following in my collection because they work so well and make such good waffles.

Griswold No7, pattern 308/309/326

Griswold No8, pattern 314/315/328

Griswold No11, pattern 363/364/987

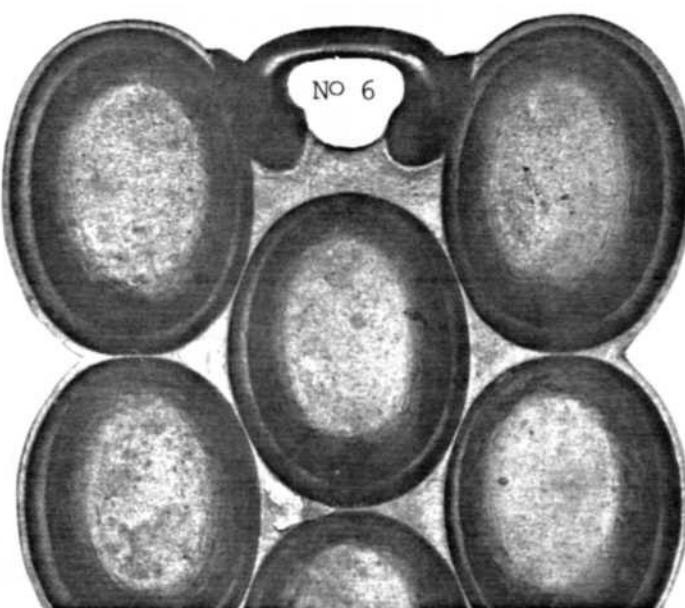

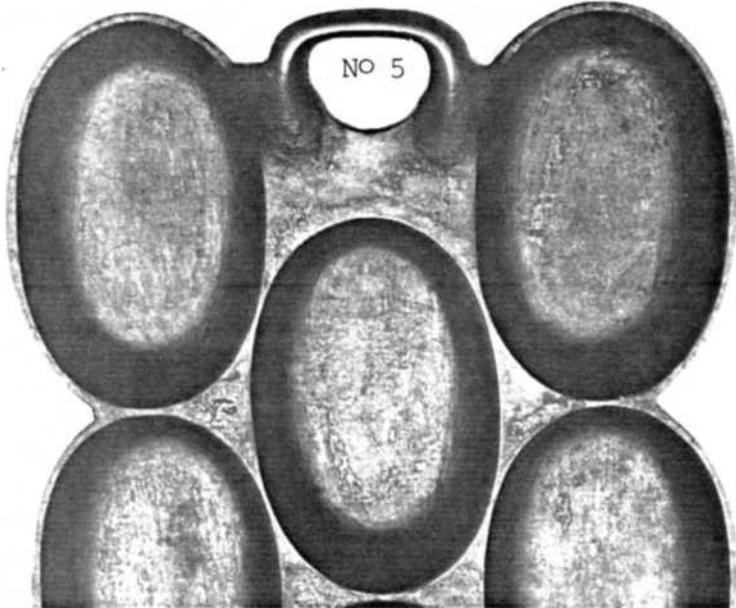

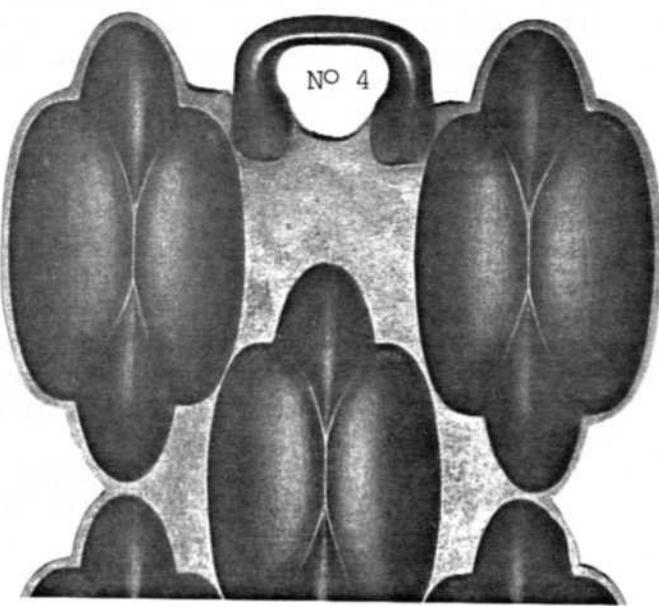

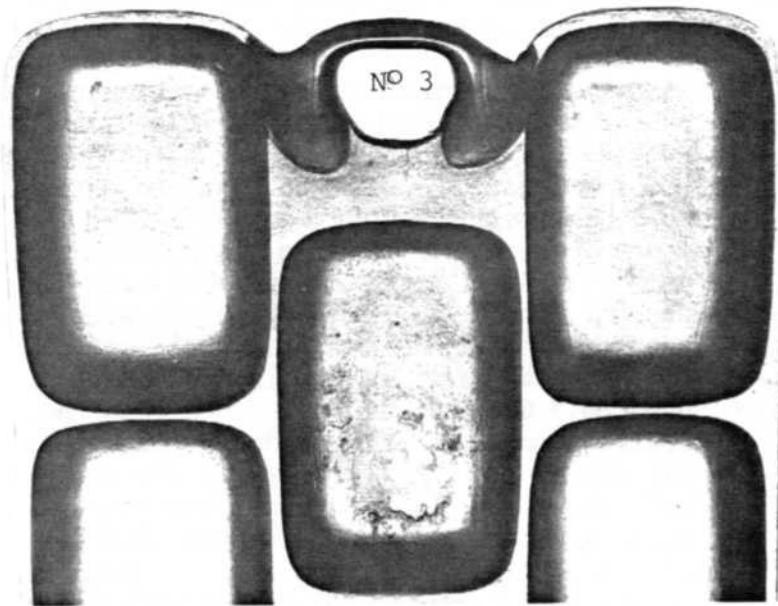

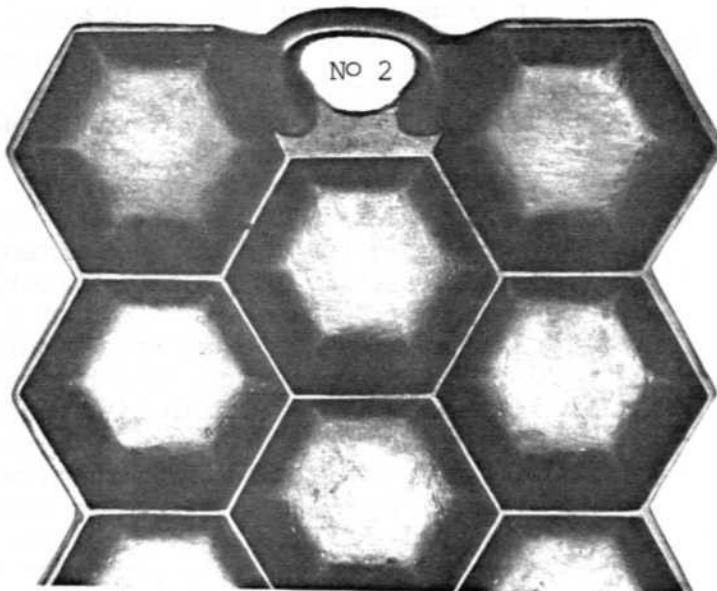

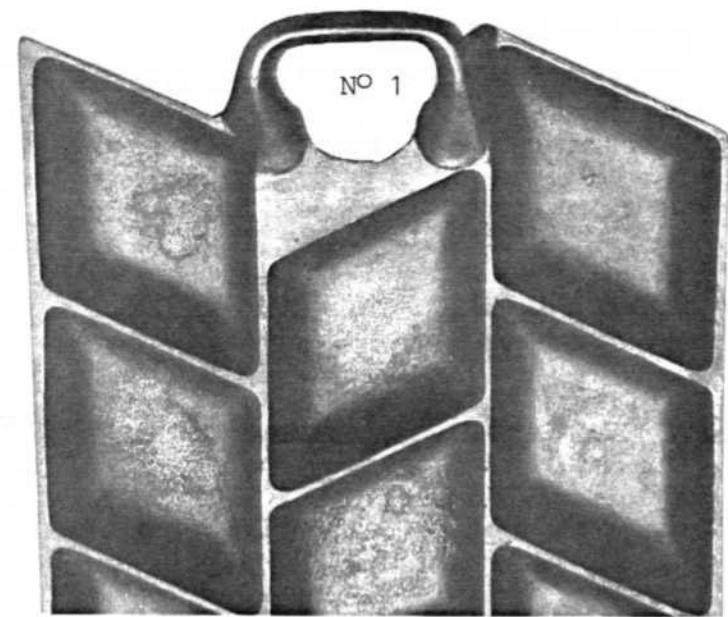

Griswold No18 Heart Star p/n 919/920/915

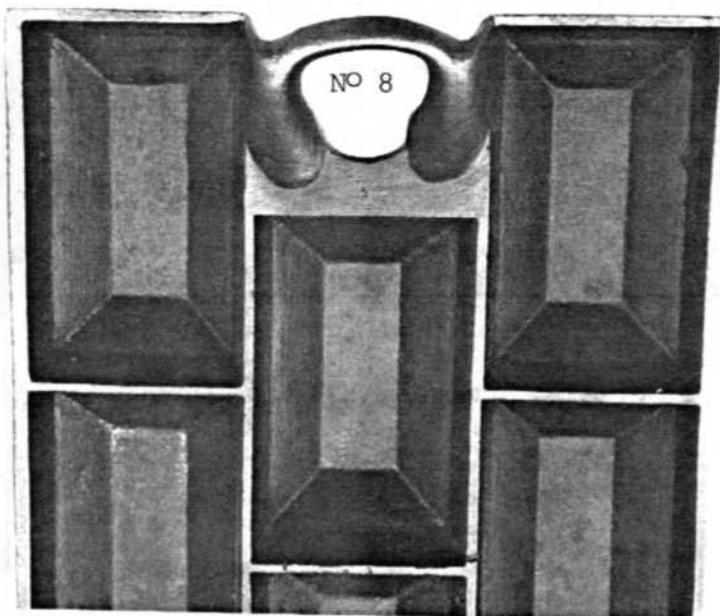

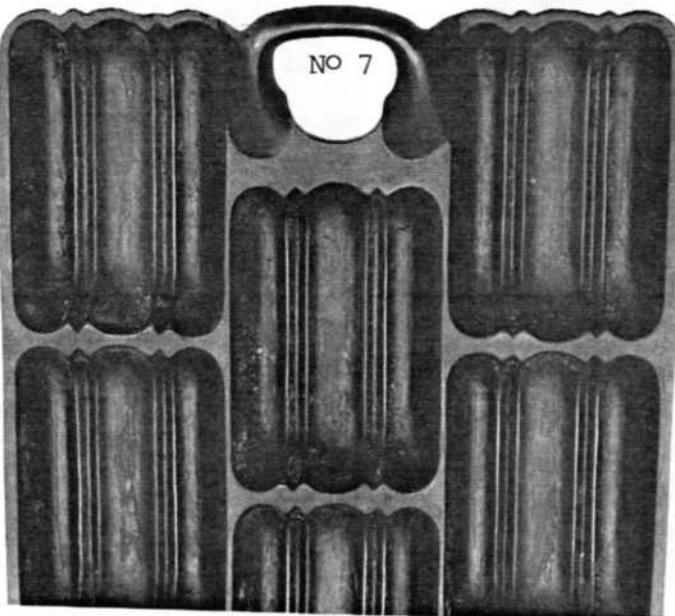

All are c.1920 Griswold irons on high frames because I have found they are of top quality and design and have a well balanced feel in use. The high frames, designed for use on gas stoves, work equally well on electric stoves with the spiral coil elements. Waffle irons may not work on many newer types of electric stoves. Low frames can also be used but are not as convenient in that they are harder to turn and may not heat as evenly. My irons all have wire coil handles with the large diameter eyebolt through the center and the small, cast ferrule by the eye (except for the Heart Star which doesn't use the ferrule). Wood handles and earlier coil handles such as used on 885/886 pattern irons are not so substantial in construction and do not have the good feel of the heavier design. The latest (c.1930) heavy wire handles without the center eyebolt are just too heavy and feel clunky in use. Having used No.9 Griswold irons I found that the waffles come out somewhat doughy because the spaces between the knobs in the pattern are too wide. "CLOWS" irons make good waffles but come only on low frames. If I had to keep only one iron it would be my No8 pattern 314/315 (312/314 were made in small numbers and are identical) round iron which gives a near-perfect, traditional patterned waffle. Acquired around 1968 for \$5 from a San Francisco junk shop, it is still the best waffle maker I have had.

My "secret" for making perfect waffles?

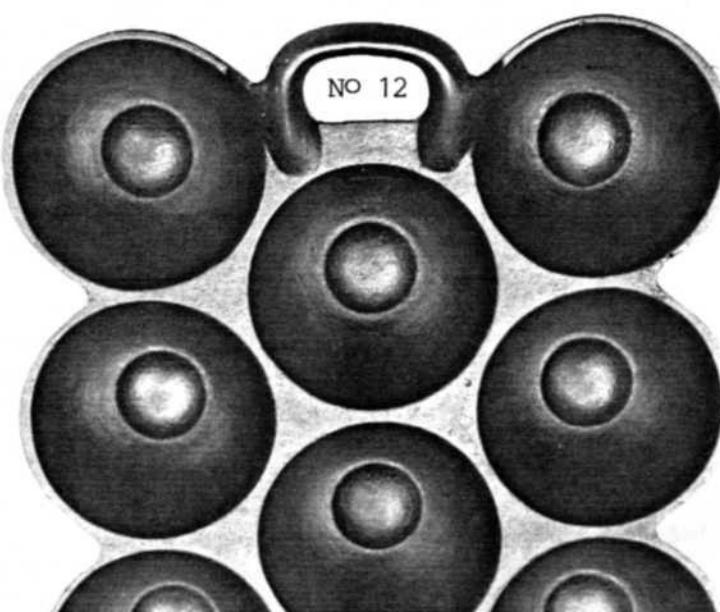

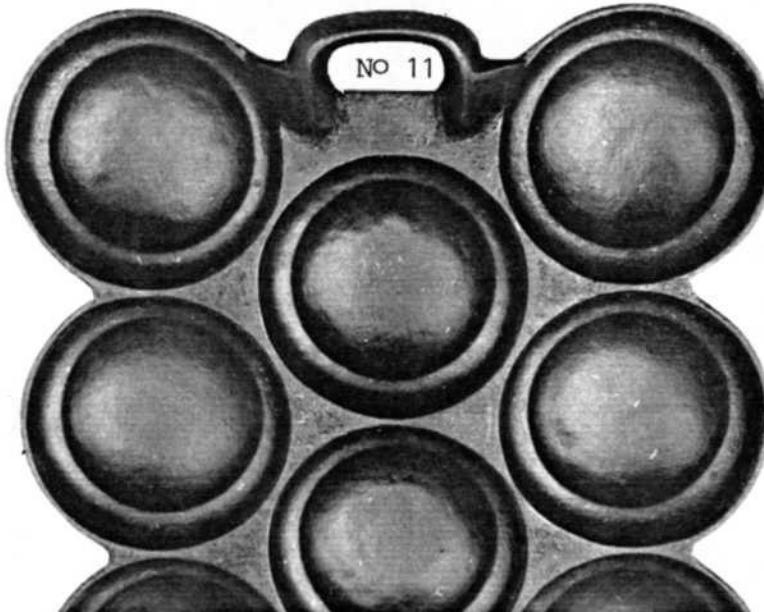

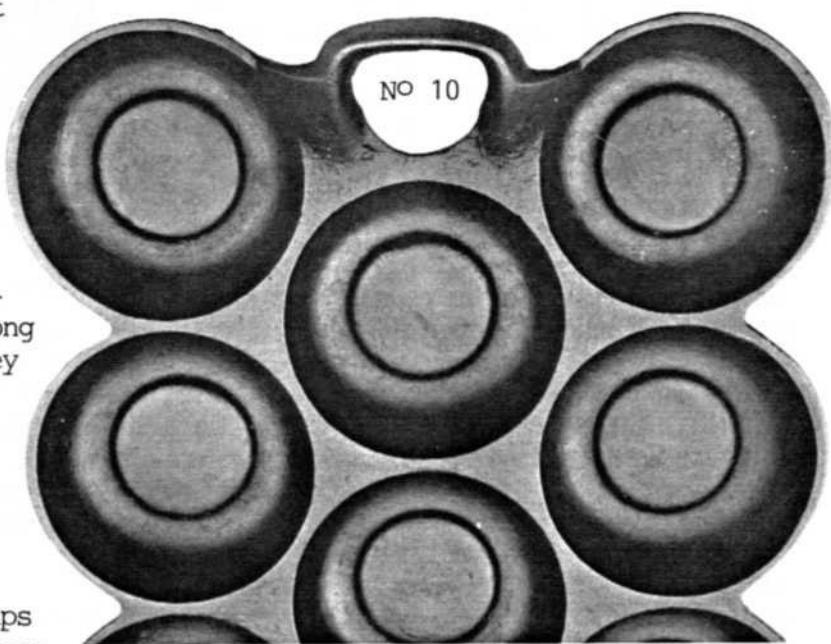

About one cup Bisquick in mixing bowl.

Break up lumps with mixing spoon. Add one egg, one tablespoon or a little more oil, and sufficient milk to make batter thin without being runny. Mix as little as possible. Pour into preheated, seasoned iron that is just beginning to smoke when opened. Turn iron immediately and cook for about one minute. Remove waffle and top with REAL maple syrup. Too much mixing of the batter or too thick batter give heavy, tough waffles. No need to ever wash or oil the waffle iron—the oil (or melted butter) in the batter takes care of that.

Pictured on these two pages is a full set of G.F. Filley muffin irons made in Saint Louis, MO c. 1880's. Shown in part and close up for detail. There has been no documented evidence that a No 9 pan was made; an 1884 Filley catalog (see CICN p. 61) omits a No 9 but does list a No 15 for \$8 per dozen. All the other pans were only \$3.75 per dozen so, perhaps, the No 15 may have been a commercial sized pan. Nos. 1, 2, 4 and 7 are among the rarer and more desirable of the Filley pans while Nos. 10 and 3 are the most common. While several different Filley pans have been found that were unmarked, most will be marked under the handles with the name and the Number. Most pans have several crude gate marks on the bottom of the cups while later pans are gated along the top, outer edge of the cups on one side. I've had Nos. 6 and 7 this way.

Correction: On p.21 of CICN I have mixed up the catalog numbers for the two breakfast pans pictured. The bacon fryer on the left is cat. 1103 and the breakfast skillet on the right is cat. 1101. Also, the last sentence should read: The 1103 pan has not been seen...

ADDITIONS TO MUFFIN PAN LIST

Listed below are additions to the muffin pan list on pg.25 of CICN. Included are three pans catalogued by Griswold and six pans that were made by Griswold but do not show up in Griswold catalogs. Please contact me if you know of additional pans that should be listed, or suggestions that will make the list better.

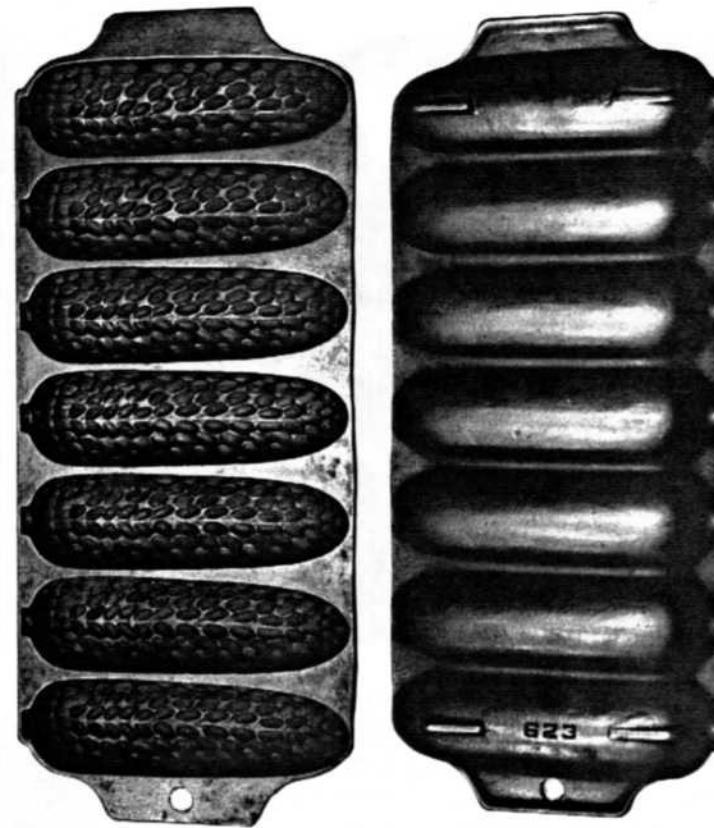

No.	p/n	cups	mk	var	rar	cup shape
1	?	1	E	1	10	vienna roll
2	956	2	E	1	9	vienna roll
10	1253	11	BM	2	4	round, deep
10	1512	11	P	1	6	round, deep
11	?	12	E	1	10	french roll
24	957	7	-	1	7	bread stick
-	623	7	-	1	10	corn/wheat cob
1270	1270	7	BM	1	5	head of wheat
1270	1513	7	P/M	2	6	head of wheat

No.1 and 2 vienna roll bread pans are usually found without pattern numbers but probably marked NO1 or NO2 and VIENNA ROLL PAN. The No10 popover pans were made for Sears in the 1930's with p/n 1253 being marked BEST MADE (BM) and p/n 1512 marked PURITAN (P). No11 is an early french roll pan shown in the 1890-91 Griswold catalog. It will probably not be marked at all.

A similar pan with cutouts and marked FRENCH NO ROLL 11 under the handles may be a Griswold pan. These pans both have cups arranged differently than the common Griswold No11 French Roll Pan. The No24 pan is identical to the No21 Griswold corn bread pan but with GRISWOLD and ERIE PA USA removed. Unnumbered cornorwheat pan, p/n 623 pictured above is a rarity. Who was it made for or sold by? The two No1270 wheat stick pans were made for Sears and marked BEST MADE (p/n 1270, c.1930) and PURITAN (c.1934) or MERIT (c.1937), both p/n 1513. Am I missing any other muffin type pans made by Griswold? Let me hear from anyone with more info.

VOLUME 2 OF GRISWOLD PRICE GUIDE BOOK IS OUT!

As with the first 184 pg. volume that came out in June, 1993, the second volume of 136 pages (incl. 32 in color) is a photo collection of various collectors' treasures with everything priced. Even with a number of errors in both books, all collectors and dealers should have both. Order from L-W Book Sales, PO Box 69, Gas City, IN 46933 (800) 777-6450 Each volume is \$19.95 + \$2 shipping one book, \$.40 ea. extra book. IN, IL, MI, OH, MN, WI add sales tax.

above Cornorwheat type stick pan made by Griswold, p/n 623. Other than the unique handles, this pan is the same as Griswold No.272. -courtesy Joe Noto collection.

below No.10 p/n 1253 popover pan made by Griswold for Sears Roebuck and Co. c.1930. The No.10 Puritan popover, p/n 1512, is the same pan made c.1934. It is not marked S.R. and CO. Note the slanted print which is typical of most of the iron Griswold made for others.

The information below is copied from a 16 page Griswold booklet titled Cheaper Cuts of Meat and How to Prepare Them—A Book of Recipes Using Cheaper Cuts of Meat, cooked in the Griswold Tite Top Baster. Price 25 cents. Copyright 1919. Note the fourth paragraph on seasoning cast iron cookware. Courtesy Richard Brandt, Ohio

CAST IRON COOKING UTENSILS

Griswold Tite Top Basters are made of Cast Iron and never wear out—the older the utensils, the better and more valuable they become. One is considered fortunate nowadays if by chance one of these iron utensils is handed down to them from the second to the third generation. It is on account of these wonderful Cast Iron utensils that you have such fond recollections of the rich, juicy steaks and chops your grandmother used to serve.

In the early days Cast Iron was about the only metal used in cooking utensils. Since then, however, the clamor for cheaper, lighter weight utensils has brought into use many cheaply made vessels which are ready for the scrap heap about the time a Cast Iron utensil would be in its prime, and improving with age.

Breaking in or seasoning Griswold Cast Iron utensils is simple and easy. If at first you will cook in these utensils only fats, such as beef, pork or lamb roasts until the utensil becomes thoroughly saturated with the grease, you will have a smooth, clean cooking utensil forever after.

To hasten this process, when the utensil is new and perfectly clean, place over the fire and heat well. Cut into the vessel small bits of fat, from left overs, or buy two pounds of beef or mutton fat and allow to simmer over fire for at least five hours, and cool in Baster over night. See that lids and sides of the utensil are well smeared over with the grease several times during the seasoning process. After this heat up the Baster again and drain off the grease, wipe the utensil clean with tissue paper or clean, dry cloth, and it is ready for use. Perfectly clean, wholesome and free from poisonous oxides, or chips of enamel.

Owing to the liberal use of grease from the start, Skillets, Griddles and Waffle Irons require no special seasoning.

To avoid cracking Cast Iron Ware, turn heat on gradually in center of utensil. Do not turn intense heat on a cold Cast Iron utensil, or pour anything cold into it while overheated.

If water has been allowed to stand in a Cast Iron utensil for any length of time see that the utensil is thoroughly dried before putting away. This little care and precaution is what made the cooking utensils of your grandmother so valuable, and it will prove just as valuable to you. Your first investment in Griswold Cast Iron utensils is all you will ever have.

Every housewife knows a rich, juicy roast or fowl when it is served—not every housewife has the time to do her own cooking or even bother to see that her cook is doing the proper thing. Give the cook Griswold Cast Iron utensils and the problem will be solved.

Extra Finish Cast Iron Utensils are the only cooking utensils that improve with age. No good cook or housewife would dispute this fact. Owing to the nature of the metal, which is more or less porous, they absorb little additional fat frying, making the food cooked in same more healthful. There is no enamel to crack off (a thing that is very dangerous to one's health), no tin or paint to burn off—these utensils are pure iron all the way through. To equip your kitchen with a line of cast iron cooking utensils means that you will never have to replace them, they will *not* wear out. These utensils are light in weight and convenient to handle.

These utensils are the only cooking utensils that improve with age. No good cook or housewife would dispute this fact. Owing to the nature of the metal, which is more or less porous, they absorb little additional fat frying, making the food cooked in same more healthful. There is no enamel to crack off (a thing that is very dangerous to one's health), no tin or paint to burn off—these utensils are pure iron all the way through. To equip your kitchen with a line of cast iron cooking utensils means that you will never have to replace them, they will *not* wear out. These utensils are light in weight and convenient to handle.

The Tite Top Baster has a tight fitting cover which makes it impossible for any of the delicious, nourishing goodness and flavor to escape.

The Griswold Tite Top Baster is of uniform thickness, anything cooked or roasted in it will be well done, no parts overdone or no parts undercooked, because the heat is evenly distributed.

The Tite Top Baster may be used for baking, boiling, roasting or frying; this utensil is ideal for boiling or baking hams, roasting chickens, even the toughest fowl can be made tender if cooked in it. It also is wonderful for the cheaper cuts of meats, by adding a few vegetables and making them into the most savory stews.

Every housewife knows how hard it is to fry doughnuts, potato chips, French fry potatoes, etc., when just an ordinary kettle of enamel is used, it is almost impossible to keep the fat the right temperature so as to brown the things evenly without allowing the fat to soak inside. When the Tite Top Baster is once well heated it will retain the heat as wanted.

The Griswold Tite Top Baster is an improved utensil in many valuable ways over the regular Dutch Oven.

The Griswold Tite Top Baster has a machined edge cover and rim—these have been ground down until both fit each other perfectly so that when food is cooked in the Tite Top Baster, every bit of meat that has been bought and paid for will be retained because the moisture not being allowed to pass off in steam, the meat cannot shrink, evaporate or shrivel. The juices stay in the meat itself, hence there can be no possible danger of having the meat tasteless, tough or dry.

This fact has been proven by an actual test made by the Good Housekeeping Institute. Two pieces of meat of the same kind, weighing five pounds each were used for the test. One was pot roasted in an ordinary Dutch oven, the other was pot roasted in the Tite Top Baster; both were allowed to roast the same amount of time—four hours. After the given time the pot roast was tested and a comparison made of their textures; the one roasted in the Tite Top Baster was very tender, juicy and of finer texture; the pot roast cooked in the ordinary Dutch oven was extremely tough and dry and weighed 11 ounces less than the one cooked in the Tite Top Baster.

Another good feature the Tite Top Baster has is its self-basting cover. This cover is made with three so-called rims or ribs on the inside of the cover, these rims or ribs gather the moisture and distribute it over the entire surface of the contents of the kettle, making the Tite Top Baster a self-baster. The handle of the Tite Top Baster is also a great improvement over the ordinary Dutch oven. In raising the handle automatically fits into a groove which keeps it in the center; this checks the handle, making it a *self-locking bail*. The Baster cannot tip to one side—there can be no danger of being scalded by the contents of the kettle spilling out.

The Tite Top Baster is sold with or without the trivet. Many housewives prefer using the trivet when roasting meats with vegetables in the same kettle. For general cooking the results are equally as good without it.

The Griswold Tite Top Baster is a great fuel saver, a thing that greatly counts these days and should count at any time—anything wasted means just so much less of the things we most desire.

Meat can be roasting in the Tite Top Baster, potatoes can be cooked in the baster with the meat and at the same time bread or other things which require a high temperature may be baked—this means the saving of gas. The Tite Top Baster will also save gas when using it for pot roasts, stews, etc., because when it once becomes thoroughly heated it will take but a minimum amount of gas to keep the food cooking at a desired temperature.

WAGNER COLLECTORS UNITE!!! We need a book of our own and if we pool the knowledge of our own collections we can have one. I am willing to write it. LET ME HEAR FROM YOU!

Thomas A. Todson, 1650 E. Missouri #2,
Las Cruces, NM 88001 (505) 522-6074

Please include any catalog information you might have by Xerox. I will pay for the copying. Also- WANTED: Wagner #11-14 skillets. Any collectors of Martin Stove & Range Holloware please contact me if you have any pieces for sale, or I have some old pieces from here in the southwest (used here) for trade. Contact me by mail at above address. I was born in Huntsville, AL where Martin had a foundry and I am starting to collect Martin hollow ware. Would like to communicate with other Martin Stove and Range hollow ware collectors to share info.

WANTED: Griswold Santa, pup, loaf pan, mail box, muffin pans (vienna, golf ball, etc.) other unusual. Filley pieces. Gerald Sears, Rt. 1 Box 144, Southwest City, MO 64863 (417) 762-3643 (8-93)

WANTED: Griswold trivet for No.3 Oval Roaster; Nos. 2,13,20 block TM/heat ring skillets; lid for #15 Oval Skillet. Rhea Hart, PO Box 1271, Lake City, FL 32056 (904) 752-3837 evenings

WANTED: Griswold No283 Cornstick Pan. Ray F. Dowden, 2737 Apache Dr., Anderson, IN 46012 (317) 644-1942

WANTED: Griswold reasonably priced lids; any size smooth hinged lids; lid for 3-leg dutch oven. Wagner No6 round roaster lid; #3 & 9 covers for oval roaster and oval trivets any size. Good condition please, no pits! Lynn Kiper, PO Box 759, 29 Palms, CA 92277

WANTED: Camp Dutch Ovens with 3-legs and rimmed lid. Provide description, identification and price. John G. Ragsdale, 405 Exchange Bldg., PO Box 8, El Dorado, AR 71731

WANTED: Griswold Oval Roasters; Loaf Pan w/Cover; other items in exc. cond. Arlo Chapman, PO Box 506, St. Charles, IL 60174

WANTED: Griswold 5-tier dutch oven rack. William Bryan, 44 West Alisal, PO Box 2155, Salinas, CA 93902-2155 (408) 424-0844

The following ad was submitted early last year so his individual pieces I will not list as they are probably sold. My apologies to the subscribers and Craig for any inconvenience caused by this issue being so late.

FOR SALE: Alfred Andresen product line (made by Griswold)- Heart waffle iron, Goro irons, wafer irons, munk and plett pans. Sent me your name and address for copy of 1905 Andresen product brochure. It has pictures & product descriptions. Also have a "For Sale" list available featuring Griswold, Wagner, Favorite, and others. Call or send your name & address to be added to my mailing list. Craig C. Leverenz, 439 Mt. Curve Blvd., St. Paul, MN 55105 (612) 699-1211

Also submitted last year--most of his wants are probably still WANTED: Wagner skillets: straight sides, heat ring, block letters-all but #7,8,10; script letters- #2,3,9 and larger. Also interested in other unusual skillets (Martin, Mi-Pet, Oazrk, etc.) Black iron, nickel, chrome, aluminum are all of interest to me. Also want unusual waffle irons. Call or write with price, condition. Travis Solomon, 1712 La Frenz Rd., Liberty, MO 64068 (816) 792-2205

WANTED: Griswold No8 or 10 skillet covers; any brand waffle iron; small dutch oven to feed one man. Will buy or have to trade Favorite No1 and 3 skillets, Griswold No6 slant/Erie and No3 block heat ring skillets, Andresen plett pan and others. Hal Culver, 14310 Wicks Blvd., San Leandro, CA 94577 (510) 351-0461

WANTED to buy or trade for: Salesman Samples and miniature pieces, skillet lids and any Vienna Roll, French Roll, gem, bread and tark head pans (all Griswold). Dave Lange, 3118 Bird Dr., Erie, PA 16510 (814)899-7926

FOR SALE: Griswold No11 skillet, block TM \$140; No11 waffle 2148/2149, high frame, curved wood handles \$120; No4 skillet, sm. tm. \$30; early lamb mold pattern 865/866 \$150; 109 skillet griddle, sm.tm. \$65; Deep Patty Bowl 72 \$40; Favorite No9 long griddle \$40; Andresen Heart Waffle \$135; Lodge 12-cup tark head muffin like Griswold No240 \$40; Sidney Hollow Ware No9 tea kettle \$65; Shinnick tea kettle, pat.1863 \$65; A&W No13 Sad Heater \$50; Sperry size 8 skillet, pat. 1887 \$35; size 8 deep skillet pat.1887 \$40.

Wanted: Griswold No3 oval roaster trivet; No27 or 28 wheat stick without cutouts. Have No28 with cutouts to trade or will buy. Steve Stephens, 28 Angela Ave., San Anselmo, CA 94960 (415)453-7790

Catalogs, pamphlets, sales information, etc. (Xerox copies are fine) for me to use in
my evaluation. Please send to me in stamp card, as received.

CAST IRON COOKWARE FOR TRADE

June 1989 List

Steve Stephens

28 Angela Ave., San Anselmo, CA 94960

(415) 453-7790 anytime

The following are for trade only except that I have put a price on each piece that I would be willing to sell it for. This price in no way reflects its true value and in most cases, it is higher than the piece is probably worth. Most pieces are in fully restored condition. I would like to trade up or down for pieces that I am looking for (see my want list section on this sheet). Price is in parenthesis.

Griswold No2 skillet, 19, blocks 10", no lid, ring, VG/F (250)

Griswold No13 skillet, slant TM Erie PA, USA, VG/F (500)

Griswold No20 skillet, lg. block "M", VG/F (350)

Griswold No13 Oval Skillet, 1012, E/F (175)

Griswold No11 Oval Skillet, 1013, never used, VG/F (275)

Griswold No300 Heat Regulator, both sides different, E/F (350)

Griswold 2-piece open back cabinet cake mold (back part is 2" deep outline of rabbit) F-G/pr (150)

Griswold No2-8 ski-lots, VG/F (100)

Griswold Oval Steak Platter, 949, chromed, VG/pr (60)

Griswold No9 oval iron for Oval Roaster, 277, E/F, trade for No7 oval trivet (150)

Griswold No8 oval griddle, 712, VG/pr (125)

Griswold 5-section round Breakfast Skillet, 665, E/F (150)

Griswold Double Broiler, twin burner, 875/876, E/F (125)

Griswold No6 waffle iron, Paced, 1880, waffle pattern is engraving in circles, VG/F (4350)

Griswold No8 muffin pan, latest style, slant TM EPD, 946, E/F (130)

Griswold No9 "Bacon Cake Fan", 947, F/F (195)

Griswold No17 muffin pan, 6-cup french roll pan, late style, 6140, E/F (140)

Griswold No21 7-stick "Cinn Bread Pan", 961, E/F (125)

Boyz stone heart shaped w/ handle, very fine casting and detail, 4 in dia., E/F (160)

H. Farver's Sons, New York w/fer iron w/handled frame, dated-dine-41, H/S, VG/F (200)

Landers, Frary & Clark No11 coffee grinder, VG/original condition, 142,51

****Remember, the pictures given here are only to allow a desirous person to buy what which I do not particularly wish to sell. For purposes of trade my evaluation is much less.

CAST IRON COOKWARE FOR SALE

All so!

Steve Stephens (415)453-7790 early/late is best
28 Angela Ave., San Anselmo, CA 94960 4/1/90

This list replaces all previous ones. There are a lot of new pieces on this list since I have decided to cut the size of my collection by over one half. It is a lengthy list so may I suggest you go over it once and mark any pieces that you might be interested in. If you want more information as to condition, etc. please call and I'd be happy to give you a complete description. As usual, all pieces are fully guaranteed as to your satisfaction and you may return any piece within 10 days of receipt for a refund if it is in the same condition you received it in. As to quality--most everything listed here is in very good to excellent condition and most of it is restored. That which is not restored should restore to very good or better. Over half of the items are from my own collection and I had intended to keep them. There is no junk here, it is all good stuff! No cracks, warps, pitting or repaired pieces unless otherwise noted but be sure to ask me about the exact condition when you call. A few pieces do have some minor pitting due to years of use but in most cases it is unobjectionable. I am now doing very little iron collecting so there will be very few new pieces added to my lists in the future. When this stuff is gone there won't be any more from me so if you see something here that interests you it might be the time to buy it. All prices plus shipping & insurance. Many of the listed waffle irons are not restored and are priced cheaply. They will restore to very nice condition, though. 80% of the muffin pans, which were my favorite type of piece, are restored. There are almost no duplicates and most of them are very nice examples of their type. Many are upgraded and the best of the ones I've had over the years. Abbreviations:

G-Criswold, W-Wagner, EPU-Erie, Pa U.S.A. Everything is old- no reproductions or fakes! U-unmarked

Aluminum Cast Cookware: The following are in good to very good condition: Griswold Colonial Breakfast Skillet \$15; G 4 Qt. Colonial Design Safety Fill tea kettle \$25; ERIE ALUMINUM No8 handled griddle 1890's \$15; G Skillet Grill A250 \$20; G No7 wood handle skillet \$8; G No9 coil spring handle skillet (rod is broken off in skillet, otherwise VG and repairable) \$5; G No aluminum waffle irons, no frame, 1922 patent, good handles \$15; Wagner Rapid Heating Griddle, wood handle, Pat'd Oct 10, 1916 \$5; Pot Shop, Boston 16, Mass. oval skillet with handle that looks like late Griswold. Bowl of pot is 7 x 10", \$10. All this aluminum totals \$118. I will sell the lot for \$50. That's cheap considering the quality and type of pieces. Going once, going twice.... please buy it all!

Also for sale: 1920 player piano, rebuilt and in very good original condition. \$2300. 1966 VW bus, orig paint, very good cond. I am 2nd owner. \$2000. 1971 Norton Commando motorcycle, 14000 miles, one owner, \$2000. Rectangular ash kitchen table, solid, \$200. Hunter ceiling fan, new blades, \$75.

1890 Griswold catalog reprint: I've seen pre-production copy of catalog from Courtney McClendon and report that it contains many Griswold items you've never seen. Recommend it to all Griswold collectors so if you haven't sent for yours yet consider doing so. Oldest Griswold catalog known!! **Miscellaneous:** Griswold No3 deep patty molds, round & heart with handles. These are rare and are bigger than the common No2 patty molds, like new, \$100; early Wagner (unmarked) bundt pan, \$60; Wagner Baking Pan 1508, 10 x 13 $\frac{1}{2}$ " black iron, \$70; Display Rack, Wagner Ware, c. 1960's, 16 x 48 x 24 high, flat shelf on top. Under shelf are adjustable hooks to hold 4 rows (48 pans total) of skillets, griddles or similar. In near new condition, very sturdy. Can be broken down for shipment, \$125; J. Savery's Sons 3-leg dutch oven with lipped lid for coals. No4 $\frac{1}{2}$ which is about a size 9. In super condition, pot is c. 1860 and comes with lifting hook. A great, early dutch oven for campfire or fireplace cooking, no pitting or cracks. Made in NY. \$100; Griswold Post Box, large print under lid, very nice, \$50; G large Post Box marked No6, Mfg. Co. Erie PA. Identical to ones marked Selden & Griswold but name has been removed from pattern probably when S & G broke up their partnership. \$45; Ace Cloverleaf Donut Form, \$95; very early, c. 1850 bowl-like skillet w/3 short legs. Would make a nice fruit bowl or table serving bowl, 2 $\frac{1}{2}$ " deep, 10" across, \$40; J Savery & Son, New York, The Phoenix Works No5 lipped cover for dutch oven, fancy, c. 1850, fits pot w/9 $\frac{1}{4}$ " inside dia., \$8; Lodge No1 straight side saucepan, 1 pt. \$12; U No2 bulged saucepan, nice shape, \$20; U covered pot, 4 $\frac{1}{4}$ " deep, 7" dia., rim around outside 1 $\frac{1}{4}$ " from bottom to sit down into stove opening, c. 1860 unusual, \$40; Griswold No401 gas hot plate, \$35; U pot, c. 1850 w/hand forged bale, 3 legs, 3 $\frac{1}{2}$ " deep 12" dia., legs are 2 $\frac{1}{2}$ " long, bottom has a moderate dish to it (not warped) \$45; sad iron heater like shown in Harned's book p.61 bottom, rare, \$195; **Plett Pans/Aebelskivers:** Griswold slantTM Plett Pan 2980, \$45; L.E.Nelson plett pan, c. 1880, \$25; Griswold diamond ERIE TM Aebelskiver, \$50; U c. 1850 Aebelskiver or Munk pan, \$35; **Pancake Griddles:** Axford Cloverleaf Pancake Griddle makes 3 cakes on any gas or electric stove, the best pancake maker, \$85; Wagner No2, c. 1910 makes 2 cakes, flop-over type, bale handle on frame, \$85; Mrs. Shaefers Cake Griddle Pat'd Sep. 24, 1889 Mfg. by Illinois Griddle Co, Morris, Ill., 3 cakes, flop over type, \$50; The Canton Griddle Mfg. by Canton Griddle Co, Canton, O. Pat'd Apr 28, 1898 makes 3 square cakes, flop over type, \$55; **Breakfast Skillets:** Griswold 665 5-part Breakfast Skillet, \$100; Best Made (Griswold for Sears) Bacon & Egg Fryer, \$18; same, \$15; Lodge Bacon & Egg Griddle, straight sides, round ends, \$10; Wagner square bacon fryer, 1103 w/bacon press, \$50; Stearns "Broillett" rectangular pan, \$20; Otter River Foundry, Otter River, Mass. USA makes 4 square eggs, \$25; "SQUAREG" Frying Pan No4, Atlas-Ansonia Co., New Haven, Conn. \$22; **Broilers, round:** U double broiler, high domed, \$50; single, domed \$15; single, domed \$20;
