

Foundries of the Past and Present

Griswold, Wapak, Favorite Ware, Wagner Ware, Wapak are some of the more recognized foundries for cast iron and aluminum cookware. There are however, many, MANY others that made cast iron and aluminum products. This link will be for those cast iron foundries in the USA and Canada. Some of these companies may not be actual foundries but may have just had their name put on pieces by another foundry. If we have more info for the foundries below, there will be a **HYPERLINK** attached to it, so just click on it for more information, pictures, etc. If you have information, have a differing view point or anything you'd like to contribute to this archive, just let me know. You can email [ME](#). Thanks for your support.

CAST IRON COOKWARE COMPANIES

Just a beginning of what I hope will become a comprehensive sweeting of all the makers of American cast iron cookware (hollow ware) from c.1850 to c. 1960 which is approximately the end of quality (and collectible) iron cookware made in North Amerca. Some of these companies or names may not be actual foundries but may have just had their name put on pieces by another foundry or be brands or tradenames. Names, as far as possible, are shown exactly as they appear on pieces or in company literature. **CAPITAL** letters generally indicate markings on the piece are in capitals. Pieces from the same company will sometimes be marked in slightly different ways.

Please help me fill in the blanks, make corrections, etc. I'd also like to include what types of pieces were made by each company and what I presently know. I retain all rights to use this list in any manner I see fit.
